

I. Architectural Madrid and Barcelona

In fact the recent Nunes government is clear to discern – aligned with EU and even Indian Communist and major philosopher Sirohi with other major philosophers living with him all voting for the new Hegel as Sirohi – the common word among women who are all young students and women who are organic intellectual working class women that he is revolting against the unjust capitalism and lumpen order – which then is how Madrid is basically a lumpen order of living with housing and jobs all in segmentation of the lumpen order – types of large housing calles and even plazas and Madrid metro, and even forms of artistic living and business houses and calles which are all lumpen ordered. Barcelona is the same.

What is happening though in the poorer Spain and France though is mass organizing by Communist parties even strongest in Portuguese peasant and town classes all of whom are organised on cell phone and computer Deterior which then gives the sense that New Leftist principles are freeing them – they are all living in places like Valladolid and even Granada, Sevilla which is in Marseilles and Lyon, Nantierre which is now occupied Communism – and were previously either prostitution linked trafficked or poor people working in cheap jobs of mainly labour in the public companies of agrarian labour or even trafficked and being idle workers or in fact criminalized informalised labour across Europe.

In Buenos Aires all the communist poor women who are young are all laboring in the countryside while the city is landlords.

II. The Communist Planning – the Influence of Communist Parties

Communist parties are actually reflecting the social movement subjectivity this time of the Spanish left and are mass influence of 50,000 women, parents and even students and women, with old intellectual teachers – something like a popular front and feminist mass which then is organised fully and seems to be 20,000 young women and their families with some mix of patriarchal power among the protesters.

The new social movement is in fact a Communist social movement – in Moishe Postone's sense the abstract capitalism in Europe then has a common concrete mass social movement against capitalism which then is the dialectic in Europe as its subjectivity located in the concrete side to the people – now one would argue this social movement subjectivity with more abstract capital has become about new system of economic rights with it – something like a demand for elite housing, scholarships and feminism of a mass type is clear with the abstract capital demanding as one can see a new anti-capitalism that also means wage rights and in fact full rights to its elite citizen subject.

The old concrete mass movement also co-exists which is the working class unionizing.
